

User settings of VC Application's UI (on portal)
/ User Settings of Portal's UI

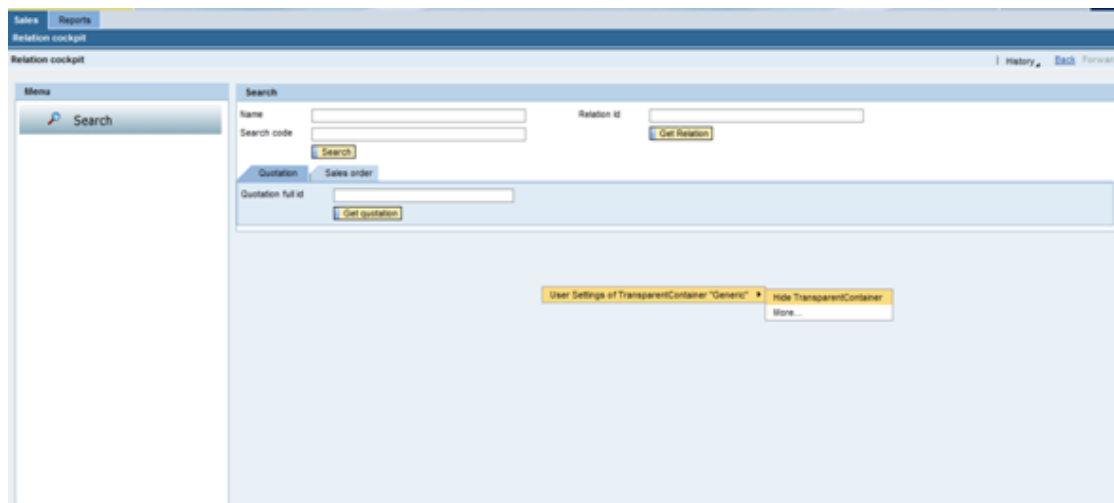

User settings on Portal

Question: How to unhide your VC application UI's / or any portal content that gets accidentally hidden with the context menu?

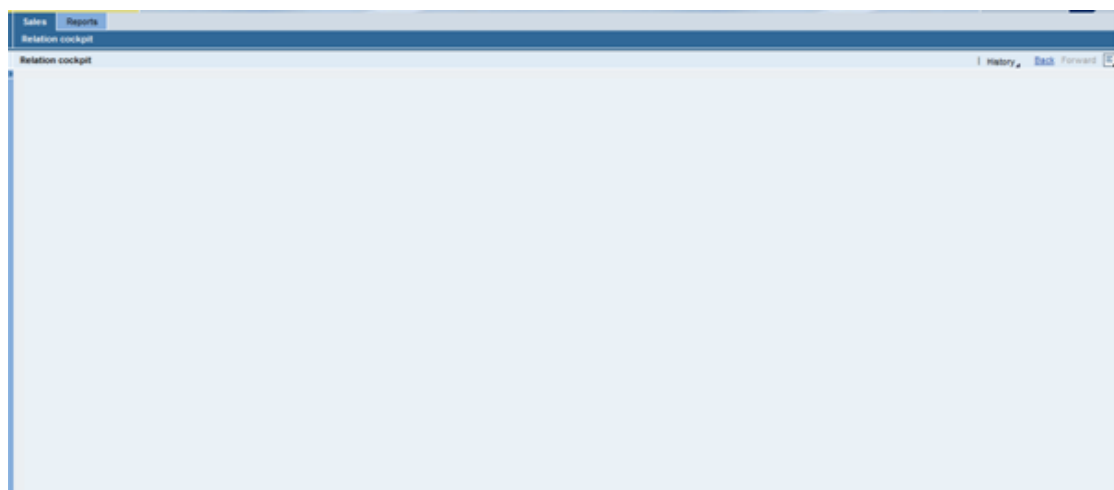

Applies to: Visual Composer for SAP NetWeaver Composition Environment 7.1.1 (EHP1) and Visual Composer 7.1, SAP Portal 7.1

What happened / Issue?

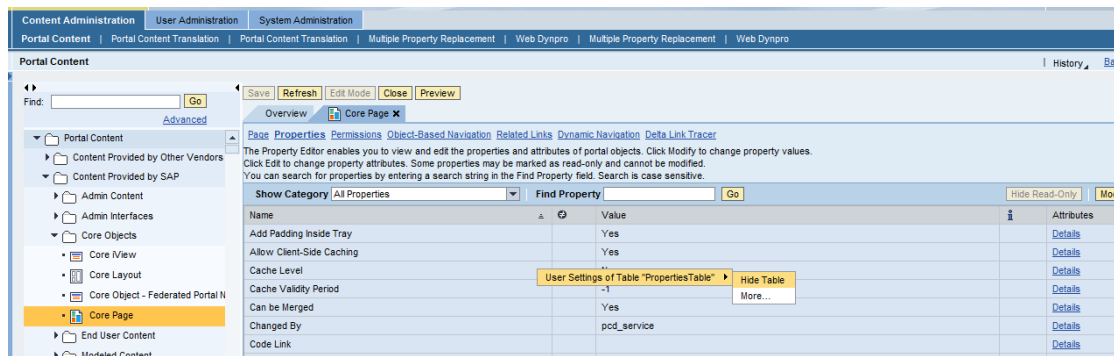

VC Application : At runtime in Portal, when you right click on the VC application, you see the context menu of "User settings of Transparent Container - Generic" -> Hide Transparent Container, wherein the user could actually hide the whole VC application's UI content that you see below!

Resulting to... (Hey where the application is !?!)

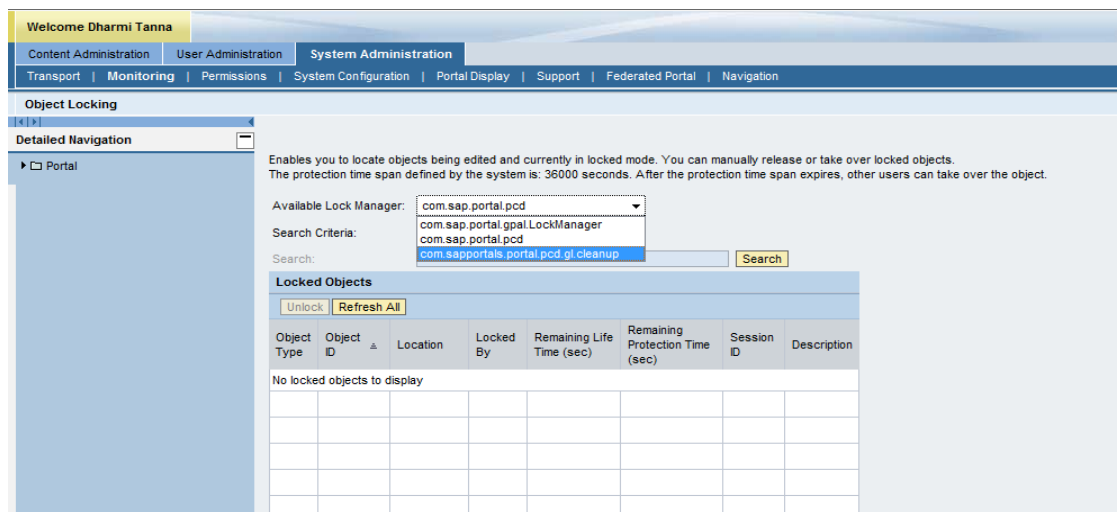

Portal: This is also true for your portal content in the Content administration as well! You could actually hide the properties table of your role / page.... The whole transparent container / table

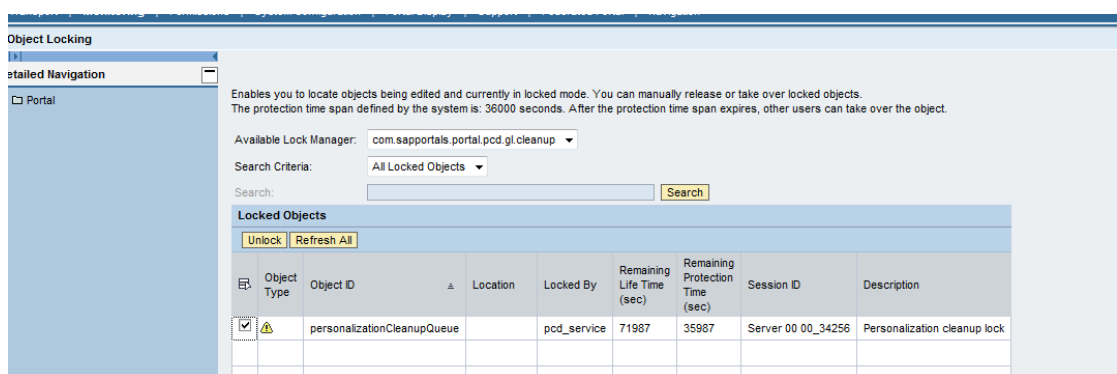

How to / Solution?

Let's see how to resolve it / unhide the UI content with the steps below:

1. Log into portal as "Administrator". Go to System Administration -> Monitoring -> select last option (com.sapportals.portal.pcd.gl.cleanup) in the Available Lock manager

2. Select the object and then click on unlock.

3. Go to System Administration -> Support -> Portal Content Directory -> then select Personalization Cleanup:

Portal Support Desk: Portal Content Directory

General Info

| Info | Description |
|--------------|------------------------|
| Central Note | 895205 |
| Component | BC-PIN-PCD |

Test and Configuration Tools

| Tool | Description |
|------------------------------------|--|
| PCD Inspector | Provides visualization and editing capabilities for the main PCD features (for example, delta link inheritance and modification visualization; where-used lists; delete, objects; object properties editing.). |
| Pcd Configuration | Displays all PCD configuration parameters with their current values. |
